Dear Colleagues,

I am delighted to welcome you to IBS Bologna Days 2016.

The purpose of the meeting is to provide an interactive forum and presentation of up to date Lectures on IBS. With the Scientific Committee, chaired by Professor Vincenzo Stanghellini, we have prepared an exciting programme covering all aspects of IBS, including the newly released Rome IV criteria, clinical algorithms, epidemiology, overlap with comorbid conditions, the role of genetic factors, diet, microbiota, inflammation and infection, diagnosis and biomarkers, as well as current and future therapeutic approaches.

Our aim is to provide the current views as well as a look to the future in the rapidly advancing field of IBS. To do so, we have designed a format based on State of the Art and Keynote Lectures, given by internationally renowned experts, and on Hot of the Press papers, presented by young investigators.

We hope that the meeting will promote friendship, exchange of ideas, opinions, discussion of cases and development of research projects that would ultimately advance the field and improve the management of our patients.

I hope you will enjoy the scientific programme, the medieval flavour of the city, its ancient University (A.D. 1088), as well as the renowned Bologna dishes.
